

TO DO [ITR2]

- USER STORIES
 - Done Part Way Incomplete
 - Generate Quiz Questions
 - Search Course Functional
 - Refine Search Topic
 - Refined History

Meeting Minutes per ITR2

- Feb 24th: Met for 90 minutes
- March 3rd: Met for 90 minutes
- March 5th: Talked digitally for 30 minutes
- March 7th: Talked digitally for 1 hour

Development Tasks Per User Story & Task Assignment

User Story	Development Task	Team Member	Time Allocated	Time Taken
Generate Quiz Questions	Be able to generate 5 quiz questions	Pietro Angiolella	2 days	2 days
Generate Quiz Questions	Be able to generate answers for said questions	Pietro Angiolella	1 day	1 day
Generate Quiz Questions	Customize generate quiz and other UI elements	Pietro Angiolella	1 day	2 days
Search Course Functional	Made a Full SU Term course list json file from the YorkU courses website, can search the course from name/ID/Dept.	Rishab Yadav	0.5 day	0.5 day
Search Course Functional	Made Course Search UI navigation for finding prof. reviews from the course name/code.	Rishab Yadav	1 day	1 day
Refine Search Topic	Added Tile formatting and animations to roadmap output to appear more intuitive	Rishab Yadav	1 day	1 day
Refine Search Topic	Refined the UI and added customizable options	Pietro Angiolella	1 day	0.5 days
Refine Search Topic	Added descriptions and customizable boxes using Rishab's UI	Pietro Angiolella	2 days	2 days

Refine Search Topic	Added Common Mistakes display	Pietro Angiolella	0.5 days	0.5 days
Refine Search Topic	UI changes including dark mode/loading animations etc.	Rishab Yadav	0.5 day	0.5 day
Generate Quiz Questions	Worked on Test case for quiz question and answer API(answer check not fully implemented yet)	Rishab Yadav	1 day	1 day
Refined History	Working on history save function	Larissa Singh	1 day	1 day
Professor Linked List	Logged and mapped each professor to the respective course id (Not all professors added for every course)	Larissa Singh Otokpa Attah	2 days	2 days
Display Professor	Displays respective professors for courses selected	Otokpa Attah	1 day	1 day
Refined History	Used Firestore to store user search history and display in History tab	Ondrea Peters	1 day	1 day
Other	Overall aesthetic overhaul from last iteration	Pietro Angiolella Rishad Yadav	2 days	2 days

Changes

1. Roadmap Changes and Other Aesthetics

- To make the app more aesthetically and user friendly to the average user, we decided to do an aesthetic overhaul. Adding more user friendly elements, streamlining where eyes will go on a page, and adding more interactive elements. This is to ensure user retention and that the page can be used by a far greater audience.

2. Expanding Into High School

- We decided to add options for the level of studying we want, such as Masters+ and High School. This slightly changes our vision statement of targeting young adults in university, but it is a needed change. This is due to the accessibility of the product increasing and adding more users to the product is always a good thing.

3. Added A Self-Review To Search Courses

- We dedicated, as well as displaying RateYourProf when applicable, to add our own rating system to the app. Other users can add ratings to professors and

courses in the app. We enjoy this system as it builds a community among the users and allows a more broad opinion than just a RateYourProf average.

Concerns With Project Going Forward

1. Incorrect Answers On Quiz Questions

- One of the main problems with a lot of AIs out there is that they do NOT know how to do math. Incorrect answers are popping up frequently and whenever an answer button would be clicked it was a different answer anytime. To address this we will look into workarounds, such as only one answer generated per question and adding a disclaimer that question answers could be wrong since we are using AI

2. UI Issues and Edge Cases

- Questions generated sometimes bleed into the next or if the question ends with a number won't appear. To combat this, more edge case handling and bug fixing will have to happen as they appear. For now, text splitting and the edges continue to happen.
